## 1 Organisation

### 1.1 DONE Call - Friday - 1:45 [2/2]

☒ call with Anna and Viktor

- ☒ update about the last week
- ☒ suggest Prototyping for Incentives Protocol
- ☒ scratch out Opti
  - ☒ Show Software Design Workflow
- ☒ reiterate Ideas
- ☒ Come up with Demi
- ☒ Add some notes to HackMD
  - ☒ readjust Opti.md
  - ☒ readjust Demi.md (ported)
  - ☒ call it a day

## 1.2 DONE Bare Setup - Saturday - 3:56 [4/4]

- ☒ do Github Setup
- ☒ setup Organisation.org File
  - ☒ send message in TG of how it works
- ☒ readjust Demi.md
  - ☒ rewrite Demi.md
- ☒ scratch out a Figma [8/8]
  - ☒ create a Frame
  - ☒ add colors
  - ☒ add Type Combi
  - ☒ clean up
  - ☒ create Input Field Component
  - ☒ create Button Component
  - ☒ generate a better logo(ported)
    - ☒ go for a die-cut sticker
    - ☒ download font
    - ☒ create outline
      - ☒ export
      - ☒ importe, generate componetnt
    - ☒ generate one
  - ☒ add Figma to Github

### 1.3 DONE Design - Sunday - 1:39 [8/8]

- ☒ generate a better logo(ported)
  - ☒ go for a die-cut sticker
  - ☒ download font
  - ☒ create outline
    - ☒ export
    - ☒ importe, generate componetnt
  - ☒ generate one
- ☒ setup up export format
- ☒ add Cover
- ☒ add Intro
- ☒ refine Logo - Inspiration
- ☒ create Landing Page, which current Design System
- ☒ clean up
- ☒ export, add to Github

### 1.4 DONE Code - Landing Page - Sunday - 6:21 [19/19]

- ☒ add inkathon! to current project somehow
- ☒ make package.json somehow work for docs
- ☒ make package.json somehow work for frontend
- ☒ make package.json somehow work for contracts
- ☒ make scripts work in root folder
- ☒ make everythin work from root
- ☒ commit that mess ina reasonable order ^^
- ☒ add current state of Organisation.org
- ☒ call with Botond, ask about Validation AI Setup

- ☒ write quick notes, add to docs/notes
- ☒ rearrange docs package, add notes, change logo
- ☒ code input field
  - ☒ get rid of boilerplate
  - ☒ add input css in global.css
  - ☒ update aichat to gpt4
  - ☒ add state via css
- ☒ code button
- ☒ align button and input field
- ☒ code logo
- ☒ code landing page
- ☒ build
- ☒ commit progress
- ☒ deploy draft (postpone, seems timeconsuming)

## 1.5 **DONE CODE - Smart Contract Draft - Monday - 6:20** **[10/10]**

- ☒ deploy draft (postpone, seems timeconsuming)
- ☒ update doom
- ☒ try netlify deploy
- ☒ setup netlify config
- ☒ deploy on frandemi.netlify.app
- ☒ Write stupid contract and compile it
- ☒ rename thingies
- ☒ deploy on local
- ☒ test via cli

- ☒ call node and validator in frontend
  - ☒ create ContractOverview Component
  - ☒ add style for h1, h2, h3, p
  - ☒ change background color of page
  - ☒ create Design for ContractOverview
    - ☒ create Variable Component
    - ☒ create Function Component
    - ☒ code Variable Component
    - ☒ code Function Component
    - ☒ combine it in ContractOverview
    - ☒ fix css
    - ☒ make it reusable
      - ☒ make FunctionComp reusable
      - ☒ make VariableComp reusable
      - ☒ make ContractOverview reusable
  - ☒ add it nicey to Main Page
  - ☒ change favicon
  - ☒ participate in Aleph Hack Call
  - ☒ make FunctionComp clicky
    - ☒ add Custon Contract
    - ☒ figure out how deployment works with current setup
    - ☒ start a from the template, figure it out
    - ☒ git clone
    - ☒ get it running
    - ☒ switch to local
    - ☒ import alice
    - ☒ w.i.p. (ported)

## 1.6 DONE CODE - Button Clicky - Tuesday - 1:47 [6/6]

- ☒ figure out how to make contracts deployment.ts file (ported)
- ☒ explore bare inkathon workflow
- ☒ import Alice in Wallet
- ☒ create new contract for testing

- ☒ read from contract and display it on Button Click
- ☒ write to contract on Button Click (ported)

### **1.7 DONE CODE - Button Clicky - Wednesday - 6:11 [14/14]**

- ☒ write to contract on Button Click (ported)
- ☒ figure out how to make contracts deployment.ts file (ported)
- ☒ handle github 2fa without phone
- ☒ add plantuml to docs
- ☒ add tasklist to docs
- ☒ understand workflow and what happens where
- ☒ make button clicky in boilerplate
- ☒ try to fix script in Demi
  - ☒ rewrite contracts scripts and make it works and get deployment
  - ☒ rewrite frontend to make it work
- ☒ commit it nicely
- ☒ add all current functions. (ported)
- ☒ try leva for a debug ui
- ☒ add read button to leva
- ☒ figure out how to keep state in sync with leva
- ☒ add a write state button (ported)

### **1.8 DONE CODE - Button Clicky - Thursday - 3:44 [7/7]**

- ☒ configure zellij
- ☒ try new colorscheme (failed )
- ☒ rewrite contract for better getters
- ☒ make leva work with getter function

- ☒ call with Botond
- ☒ add a write state button (ported again)
- ☒ add all current functions. (ported again)

### 1.9 DONE CODE - Button Clicky - Friday - 2:44 [6/6]

- ☒ add a write state button (ported again)
- ☒ add all current functions. (ported again)
  - ☒ new()
  - ☒ init()
  - ☒ get<sub>owner</sub>()
  - ☒ set<sub>owner</sub>()
  - ☒ get<sub>validator</sub>()
  - ☒ set<sub>validator</sub>() (ported again)
  - ☒ get<sub>node</sub>()
  - ☒ set<sub>node</sub>() (ported again)
- ☒ group then in read and write function
- ☒ add argument to build command, -debug-on, write inkathon team
- ☒ find a solution to call from leva
- ☒ figure out how to update value nicely (ported)
  - ☒ there is transient
  - ☒ useCallback, doesnt non cool things, don't know how to avoid, yet

### 1.10 DONE Do Debug UI - Monday - 3:19 [4/4]

- ☒ set\_validator() (ported again again)
- ☒ set\_node() (ported again again)
- ☒ figure out how to update value nicely (ported again)
  - ☒ there is transient
  - ☒ useCallback, doesnt non cool things, don't know how to avoid, yet
- ☒ repeat useHooks of react to find bug

### 1.11 DONE Do Debug UI - Tuesday - 2:45 [4/4]

- ☒ set\_validator() (ported again again)
- ☒ set\_node() (ported again again)
- ☒ figure out how to update value nicely (ported again)
  - ☒ there is transient
  - ☒ useCallback, doesnt non cool things, don't know how to avoid, yet
- ☒ forgot to record what i actually did

### 1.12 DONE Do Debug UI - Wednesday - 4:00 [1/1]

- ☒ fix more bugs on Debug UI

### 1.13 DONE Make it Work - Friday - 5:50 [10/10]

- ☒ call with Botond, quick update
- ☒ delete debug, do it again
- ☒ copy structure from Greeter, maybe
- ☒ useState instead of other options
- ☒ lets goo make butttoon

- ☒ record result send to bottond
- ☒ throw into component
- ☒ add nodes, validator, tasks to contracts
- ☒ add read function to nodes, validator, tasks
- ☒ add write function to nodes, validators, tasks (ported)

#### **1.14 DONE Fix PC - Saturday - 5:00 [3/3]**

- ☒ PC got fucked up, fix it (ported)
- ☒ be frustated
- ☒ add write function to nodes, validators, tasks (ported)

#### **1.15 DONE Fix PC - Sunday - 1:43 [3/3]**

- ☒ PC got fucked up, fix it (ported)
- ☒ be frustated
- ☒ add write function to nodes, validators, tasks (ported)

#### **1.16 DONE Make it nicey - 2:45 [6/6]**

- ☒ add write function to nodes, validators, tasks (ported)
- ☒ figuring where to spend the last hours
- ☒ add isInit to contract
- ☒ add tasks
- ☒ add nodes
- ☒ add validators

### **1.17 DONE Finish it up - 6:05 [15/15]**

- ☒ Seperate it Milestones
- ☒ Create demiOne Contract
- ☒ Create demiTwo Contract
- ☒ add LevaGreeter Component
- ☒ add LevaDemiOne Component
- ☒ add LevaDemiTwo Component
- ☒ adjust configuration
- ☒ commit everything nicely
- ☒ test everything
  - ☒ test greeter
  - ☒ test demione
  - ☒ test demitwo
- ☒ record something, send to botond
- ☒ fix encountered demitwo bug
- ☒ write README.md
- ☒ record for submission
- ☒ upload
- ☒ call it a day

### **1.18 DONE Throw 4 days more in - 3:15 [28/28]**

- ☒ fix bug with tasks
- ☒ add .gitattributes
- ☒ clean up root repo
- ☒ write demithree

- ☒ setup new cargo contract
- ☒ write deployscript
- ☒ add to workspace
- ☒ variables-
- ☒ initliase Throw4DaysMoreIn - Journey
- ☒ fix task bug in LevaDemiTwo.tsx
- ☒ add .gitattributes, only .ts and .rs
- ☒ fix, gh doesnt pick it up
- ☒ rm .rtx.toml && rm .netlify.toml
- ☒ intialise demithree
- ☒ add demithree to Workspace
- ☒ add deployscript 4 demithree
- ☒ test deployments
- ☒ add struct, init(), get<sub>init</sub>()
- ☒ add change<sub>owner</sub>(), get<sub>owner</sub>()
- ☒ add add<sub>node</sub>(), get<sub>nodes</sub>()
- ☒ add add<sub>validator</sub>(), get<sub>validators</sub>()
- ☒ add add<sub>task</sub>(), get<sub>task</sub>(), get<sub>tasks</sub>()
- ☒ update tasks to Mapping
- ☒ add ValidationRating, validated<sub>tasks</sub>, validated<sub>taskscount</sub>
- ☒ add validate<sub>task</sub>(), get<sub>validatedrating</sub>()
- ☒ rm get<sub>tasks</sub>()
- ☒ add registered<sub>nodes</sub>, registered<sub>validators</sub>
- ☒ add approved<sub>nodes</sub>, approved<sub>validator</sub>

- ☒ rm nodes, validators, getters, adders
- ☒ add approve<sub>node</sub>(), approve<sub>validator</sub>()
- ☒ rm empty<sub>message</sub>()
- ☒ rearrange in read/write section

### 1.19 **DONE** Throw 4 days more in - 2:38 [16/16]

- ☒ grab a coffee
- ☒ (contracts) fix typo
- ☒ (contracts) add getters
- ☒ (contracts) rename scripts
- ☒ (docs) update Organisation.org
- ☒ (frontend) initialise LeveDemiThree.tsx
- ☒ (contracts) commit latest deployments
- ☒ (contracts) update .gitignore
- ☒ (frontend) rearrange LeveGreeter.tsx
- ☒ (frontend) rearrange LevaDemiOne.tsx
- ☒ (frontend) rearrange LevaDemiTwo.tsx
- ☒ (frontend) npm run format
- ☒ (contracts) fix typo
- ☒ (frontend) setup read boilerplate for LeveDemiThree.tsx
- ☒ (contracts) update demithree
- ☒ (frontend) align with contract, LevaDemiThree.tsx

### 1.20 **DONE Throw 4 days more in - 2:35 [8/8]**

- ☒ resetup up
- ☒ finish things from yesterday
- ☒ grab a coffee
- ☒ (docs) update Organisation.org
- ☒ (frontend) rearrange input formats, add `get_owner()`, `init()`
- ☒ (frontend) update read Functions
- ☒ (frontend) add boilerplate for WRITE Function Section
- ☒ (contracts) add logs for finding bug

### 1.21 **DONE Throw 4 days more in 3:08 [21/21]**

- ☒ (docs) update Organisation.org
- ☒ (frontend) add `change_owner`, `add_task` & ...
- ☒ (frontend) add the rest of callers to Leva
- ☒ (docs) initialise TestingWorkflow.md
- ☒ (docs) update TestingWorkflow.md
- ☒ run test workflow A
- ☒ record A
- ☒ (contracts) adjust `register_node()`, `register_validator()`
- ☒ (docs) update TestingWorkflow, do first runthruh
- ☒ (frontend) add the rest of callers to Leva
- ☒ add it to YT, nomatter the current outcome.
- ☒ (./README) add DemiThree Status
- ☒ add timestamps to Organsiation File
- ☒ add `isInit` to Leva, fix it either ^^ (ported to futurue)

- ☒ fix unregister<sub>node</sub> (ported to future)
- ☒ fix unregister<sub>validator</sub> (ported to future)
- ☒ add task count to TestingWorkflow (ported to future)
- ☒ fix taskCount getter (ported to future)
- ☒ add validated<sub>task</sub> thingy correctly (ported to future)
- ☒ commit current Organisation.File
- ☒ call it a day
